Revolutionizing Equipment Connectivity

WainRoy Smart Steel is here!
We connect you to your equipment like never before.

www.wainroy.com

Seamless system integration

WainRoy Smart Steel integrates effortlessly with all common platforms. No need to overhaul your fleet management system – just add your WainRoy products and start tracking them on your smartphone within a 150-yard range.

Why choose WainRoy Smart Steel?

- **Geolocation:** Always know where your equipment is.
- **Loss Prevention:** Protect your assets from theft.
- **Utilization Insights:** Optimize the use of your fleet.

Save time and money

Did you know?

- Up to 20% of work time on construction sites is lost due to forgotten, lost, or stolen equipment.
- Up to 10% of equipment is lost annually through theft.
- Workers spend up to an hour a day searching for or matching up equipment.

About WainRoy Smart Steel

Available from the factory for buckets and other attachments, and as a retrofit option for all other products. WainRoy Smart Steel makes lost attachments and forgotten tools a thing of the past. By leveraging Trackunit's extensive network, you can track down all attachments and tools—even if they leave your site.

Quick and easy installation

Install WainRoy Smart Steel on-site in just one minute:

1. Tag your asset.
2. Pair with Kin via Bluetooth.
3. Enter asset data.
4. Track your asset anywhere.

Secure and long-lasting

Enjoy high-level security and encryption for your data. The battery life lasts up to 5 years under normal working conditions.

Partnership with Trackunit

The largest Bluetooth network in construction with over 1.3 million connected devices.
